

## Transportation Equipment Fund

The Government Green Fleet Award recognizes the top 40 federal, state, and local government fleet management for advancements in environmental sustainability – reducing fuel consumption and emissions; increasing vehicle efficiency; using “green” products and recycling; and planning for a sustainable future.

WSDOT is one of North America's top 100 public fleets for the second consecutive year. The award, bestowed by Government Fleet magazine, highlights WSDOT's continuing commitment to provide its customers quality fleet services. Evaluated on categories such as accountability, technology and environmental stewardship, WSDOT came in 74 from among 38,000 public fleets – an improvement from a 2011 ranking of 83. Only four state fleets made the list both years.

WSDOT, ranking in the top 13 of NAFA Sustainable Fleets, was among 9 fleets given 2012 Honorable Mentions for implementing pioneering, innovative and creative programs to help with an overall sustainable initiative.
